FREE PALLIATIVE CARE SINCE 1992
HOSPICE Casa Speranței

Founded in 1992 in Brașov, HOSPICE Casa Speranței pioneered palliative care in Romania.

The organisation provides a variety of services to both adults and children with incurable illnesses — medical and nursing care for patients and social support, psycho-emotional and spiritual counseling for the patients and their families.

All of these services are provided free of charge.

www.hospice.ro
HOSPICE initiated in 1992 the first palliative care services and opened in Braşov the first inpatient hospice in Romania in 2002. Since 2006, the organisation has been working also in Bucharest through mobile hospital support and home care teams.

To date, HOSPICE has offered specialist care to over 14,600 children and adults with incurable illnesses in Braşov, Făgăraş, Zărneşti and Bucharest.

The organisation is recognised as a benchmark in palliative care education, providing training for professionals in order to develop palliative care services at national and international level.
The need for what HOSPICE offers is huge: at a national level about 150,000 persons with incurable illnesses need palliative care services each year, while less than 6% of them receive the necessary care at the right moment.

We believe that palliative care should be a human right.
Our vision is of a future where all patients with an incurable illness in Romania are able to live and die with dignity as respected and valued members of their society.
HOSPICE has inaugurated on 19th of September the first inpatient hospice with integrated services in Bucharest.

Opening this hospice will have a very positive social impact: an additional 1,200 patients will receive care each year, palliative care coverage in Bucharest will increase from 9% to 17% and an additional 60 persons will be employed.

The organisation continues the fundraising campaign for the new hospice center in order to raise the remaining 500,000 Euro necessary to fund the first 9 months of operations.
Ways to get involved

Make a donation under the Sponsorship Law, at no cost for the company

Introduce us to others who can help HOSPICE
Until the end of the year HOSPICE Casa Sperantei is running a fundraising campaign with the objective to raise the necessary funds to offer services to patients.

The campaign will focus on the Sponsorship Law which, together with the Fiscal Code, allow companies to give sponsorship for charities for example and benefit of tax incentives up to certain limits. If the amount of sponsorship not exceeds 20% of the corporate income tax liability and 0,3% of the turnover, it creates a tax credit and reduces the corporate income tax payable by the full amount of sponsorship.

Therefore, companies can offer support to charities without any cost for themselves.
HOSPICE Casa Sperantei is looking for a partnership to promote the campaign messages inside the business environment.

We can offer visibility to the partner and the partner will be involved in CSR campaign with our foundation, supporting our beneficiaries by relieving suffering, giving hope and dignity by all our services.

Benefits of the partner:

- Logo present on the campaign site
- Mention of partnership on: campaign materials, facebook posts, newsletter section dedicated to campaign, emailing to the database about the campaign, etc.
- Presence of a roll-up banner at the event opening the campaign
